

## Services:

### Deployment & Maintenance

BuzzBoltMEDIA can provide your organization with a single point of accountability for managing your online initiatives. Deployment involves setting up your web hosting, registering domain names, managing external vendors whose products are integrated into the web site, testing on a staging server, and the final launch of the web site. Once launched, the site is monitored, and BuzzBoltMEDIA deals with all the things that can go wrong, leaving you free to focus on your primary business.

### Web Hosting

BuzzBoltMEDIA's web hosting packages provide the control, flexibility, and reliability needed to create a successful online presence. We offer a full range of packages on both Unix and Windows 2000 platforms.

### Site & Vendor Management

Lots of issues crop up when launching a web site, from minor server ftp issues to major eCommerce integration. BuzzBoltMEDIA can handle all of the project management to ensure your project's success.

### Content Updates & Integration

Keeping a web site current is an important part of having a successful online presence. Even if a visitor loves your site, they won't come back if you do not offer new information on a regular basis. BuzzBoltMEDIA's site maintenance services can help extend your online presence beyond static brochureware.

### Site Backups

BuzzBoltMEDIA makes regular on-site and off-site backups to ensure that your web site is safe and can revert to the last saved version quickly.
